OFFICE OF PETITIONS

In re Application of

Demorotski :

DECISION

Application No.: 10/710,546 Filing Date: 20 July, 2004

Attorney Docket No. (None)

This is a decision on the letter considered as a petition filed on 31 October, 2006, to revive the instant application under 37 C.F.R. §1.137(b) as having as abandoned due to unintentional delay.

Petitioner's submission suggests a lack of familiarity with practice before the Office. Petitioner may wish to seek the guidance of one registered to practice before the Office, which information may be found at www.uspto.gov.

If Petitioner intends to prosecute the instant application without assistance of Counsel, Petitioner will find forms and fee information at <a href="http://www.uspto.gov/web/forms/index.html#patent">http://www.uspto.gov/web/forms/index.html#patent</a> and <a href="http://www.uspto.gov/main/howtofees.htm">http://www.uspto.gov/main/howtofees.htm</a>, respectively.

Further, Petitioner will find guidance as to the practice before the Office in the Manual of Patent Examining Procedure (MPEP)—specifics as to the revival of applications may be found at <a href="http://www.uspto.gov/web/offices/pac/mpep/mpep.htm">http://www.uspto.gov/web/offices/pac/mpep/mpep.htm</a>.

For the reasons set forth below the petition as considered under 37 C.F.R. §1.137(b) is **DISMISSED**.

2

Application No.: 10/710,546

# NOTES:

(1) Any petition (and fee) for reconsideration of this decision <u>must</u> be submitted within <u>two</u> (2) <u>months</u> from the mail date of this decision. Extensions of time under 37 C.F.R. §1.136(a) are permitted. The reconsideration request should include a cover letter entitled "Renewed Petition under 37 C.F.R. §1.137(b)."

(2) Thereafter, there will be no further reconsideration of this matter.

#### **BACKGROUND**

#### The record reflects that:

- Petitioner failed to reply timely and properly to the final Office action mailed on 21 March, 2006 (copy enclosed), with reply due absent extension of time on or before 21 June, 2006;
- the application went abandoned by operation of law after midnight 21 June, 2006;
- the Office mailed the Notice of Abandonment on 2 October, 2006;
- with the instant letter considered as a petition (form(s) enclosed), Petitioner has failed to file the fee, the required reply to the outstanding Office action, and has failed to make the statement of unintentional delay (in the petition form).

The requirements of a petition under 37 C.F.R. §1.137(b) are the petition, fee reply to the outstanding Office action, statement of unintentional delay, and, where appropriate, a terminal disclaimer and fee.

Out of an abundance of caution, Petitioners always are reminded that those registered to practice and all others who make representations before the Office are reminded to inquire into the underlying facts of representations made to the Office and support averments with the appropriate documentation—since all owe to the Office the continuing duty to disclose.<sup>1</sup>

See supplement of 17 June, 1999. The Patent and Trademark Office is relying on petitioner's duty of candor and good faith and accepting a statement made by Petitioner. See Changes to Patent Practice and Procedure, 62 Fed. Reg. at 53160 and 53178, 1203 Offi. Gaz. Pat. Office at 88 and 103 (responses to comments 64 and 109)(applicant obligated under 37 C.F.R. §10.18 to inquire into the underlying facts and circumstances when providing statements to the Patent and Trademark Office).

Specifically, the regulations at 37 C.F.R. §10.18 provide:

Application No.: 10/710,546

#### STATUTES, REGULATIONS AND ANALYSIS

Congress has authorized the Commissioner to "revive an application if the delay is shown to the satisfaction of the Commissioner to have been "unavoidable." 35 U.S.C. §133 (1994).<sup>2</sup>

The regulations at 37 C.F.R. §1.137(a) and (b) set forth the requirements for a petitioner to revive a previously unavoidably or unintentionally, respectively, abandoned application under this congressional grant of authority. The language of 35 U.S.C. §133 and 37 C.F.R. §1.137(a) is clear, unambiguous, and without qualification: the delay in tendering the reply to the outstanding Office action, as well as filing the first petition seeking revival, must have been unavoidable for

signed by the applicant or party, each piece of correspondence filed by a practitioner in the Patent and Trademark Office must bear a signature by such practitioner complying with the provisions of §1.4(d), §1.4(e), or § 2.193(c)(1) of this chapter.

(b) By presenting to the Office (whether by signing, filing, submitting, or later advocating) any paper, the party presenting such paper, whether a practitioner or non-practitioner, is certifying that—

- (2) To the best of the party's knowledge, information and belief, formed after an inquiry reasonable under the circumstances, that —
- (i) The paper is not being presented for any improper purpose, such as to harass someone or to cause unnecessary delay or needless increase in the cost of prosecution before the Office:
- (ii) The claims and other legal contentions therein are warranted by existing law or by a nonfrivolous argument for the extension, modification, or reversal of existing law or the establishment of new law;
- (iii) The allegations and other factual contentions have evidentiary support or, if specifically so identified, are likely to have evidentiary support after a reasonable opportunity for further investigation or discovery; and
- (iv) The denials of factual contentions are warranted on the evidence, or if specifically so identified, are reasonably based on a lack of information or belief.
- (c) Violations of paragraph (b)(1) of this section by a practitioner or non-practitioner may jeopardize the validity of the application or document, or the validity or enforceability of any patent, trademark registration, or certificate resulting therefrom. Violations of any of paragraphs (b)(2)(i) through (iv) of this section are, after notice and reasonable opportunity to respond, subject to such sanctions as deemed appropriate by the Commissioner, or the Commissioner's designee, which may include, but are not limited to, any combination of
  - (1) Holding certain facts to have been established;
  - (2) Returning papers;
  - (3) Precluding a party from filing a paper, or presenting or contesting an issue;
  - (4) Imposing a monetary sanction;
  - (5) Requiring a terminal disclaimer for the period of the delay; or
  - (6) Terminating the proceedings in the Patent and Trademark Office.

(d) Any practitioner violating the provisions of this section may also be subject to disciplinary action. See § 10.23(c)(15). [Added 50 FR 5175, Feb. 6, 1985, effective Mar. 8, 1985; para. (a) revised, 58 FR 54494, Oct. 22, 1993, effective Nov. 22, 1993; paras. (a) & (b) revised, paras. (c) & (d) added, 62 FR 53131, Oct. 10, 1997, effective Dec. 1, 1997; para. (a) revised, 69 FR 56481, Sept. 21, 2004, effective Oct. 21, 2004]

35 U.S.C. §133 Time for prosecuting application.

Upon failure of the applicant to prosecute the application within six months after any action therein, of which notice has been given or mailed to the applicant, or within such shorter time, not less than thirty days, as fixed by the Commissioner in such action, the application shall be regarded as abandoned by the parties thereto, unless it be shown to the satisfaction of the Commissioner that such delay was unavoidable.

<sup>(1)</sup> All statements made therein of the party's own knowledge are true, all statements made therein on information and belief are believed to be true, and all statements made therein are made with the knowledge that whoever, in any matter within the jurisdiction of the Patent and Trademark Office, knowingly and willfully falsifies, conceals, or covers up by any trick, scheme, or device a material fact, or makes any false, fictitious or fraudulent statements or representations, or makes or uses any false writing or document knowing the same to contain any false, fictitious or fraudulent statement or entry, shall be subject to the penalties set forth under 18 U.S.C. 1001, and that violations of this paragraph may jeopardize the validity of the application or document, or the validity or enforceability of any patent, trademark registration, or certificate resulting therefrom; and

<sup>&</sup>lt;sup>2</sup> 35 U.S.C. §133 provides:

Application No.: 10/710,546

the reply now to be accepted on petition.<sup>3</sup>

Delays in responding properly raise the question whether delays are unavoidable.<sup>4</sup> Where there is a question whether the delay was unavoidable, Petitioners must meet the burden of establishing that the delay was unavoidable within the meaning of 35 U.S.C. §133 and 37 C.F.R. §1.137(a).<sup>5</sup> And the Petitioner must be diligent in attending to the matter.<sup>6</sup> Failure to do so does not constitute the care required under <u>Pratt</u>, and so cannot satisfy the test for diligence and due care.

(By contrast, <u>unintentional</u> delays are those that do not satisfy the very strict statutory and regulatory requirements of unavoidable delay, <u>and</u> also, by definition, are not intentional.<sup>7</sup>))

# Allegations as to Unintentional Delay

The requirements for a grantable petition under 37 C.F.R. §1.137(b) are the petition and fee, a statement/showing of unintentional delay, a proper reply, and—where appropriate—a terminal disclaimer and fee if the application was filed before 8 June, 1995.

It appears as of this writing that Petitioner has yet to satisfy the "fee," the "reply" and the "statement/showing" requirements under the regulation. (Petitioner may review the commentary set forth at MPEP §711.03(c) and the language at 37 C.F.R. §1.137(b) for guidance.) Petitioner also should review the discussion in the BACKGROUND, above, before resubmitting a petition.

## **CONCLUSION**

The petition as considered under 37 C.F.R. §1.137(b) is **dismissed**.

<sup>&</sup>lt;sup>3</sup> Therefore, by example, an <u>unavoidable</u> delay in the payment of the Filing Fee might occur if a reply is shipped by the US Postal Service, but due to catastrophic accident, the delivery is not made.

<sup>4</sup> See: Changes to Patent Practice and Procedure; Final Rule Notice, 62 Fed. Reg. at 53158-59 (October 10, 1997), 1203 Off. Gaz. Pat. Office at 86-87 (October 21, 1997).

<sup>&</sup>lt;sup>5</sup> See: In re Application of G, 11 USPQ2d 1378, 1380 (Comm'r Pats. 1989).

<sup>&</sup>lt;sup>6</sup> See: Diligence in Filing Petitions to Revive and Petitions to Withdraw the Holding of Abandonment, 1124 Off. Gaz. Pat. Office 33 (March 19, 1991). It was and is Petitioner's burden to exercise diligence in seeking either to have the holding of abandonment withdrawn or the application revived. See 1124 Off. Gaz. Pat. Office supra.

Therefore, by example, an <u>unintentional</u> delay in the reply might occur if the reply and transmittal form are <u>to be</u> prepared for shipment by the US Postal Service, but other pressing matters distract one's attention and the mail is not timely deposited for shipment.

#### **DETAILED ACTION**

#### **Drawings**

1. The subject matter of this application admits of illustration by a drawing to facilitate understanding of the invention. Applicant is required to furnish a drawing under 37 CFR 1.81(c). No new matter may be introduced in the required drawing. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d).

# Specification

2. Applicant is reminded of the proper content of an abstract of the disclosure.

A patent abstract is a concise statement of the technical disclosure of the patent and should include that which is new in the art to which the invention pertains. If the patent is of a basic nature, the entire technical disclosure may be new in the art, and the abstract should be directed to the entire disclosure. If the patent is in the nature of an improvement in an old apparatus, process, product, or composition, the abstract should include the technical disclosure of the improvement. In certain patents, particularly those for compounds and compositions, wherein the process for making and/or the use thereof are not obvious, the abstract should set forth a process for making and/or use thereof. If the new technical disclosure involves modifications or alternatives, the abstract should mention by way of example the preferred modification or alternative.

The abstract should not refer to purported merits or speculative applications of the invention and should not compare the invention with the prior art.

Art Unit: 3728

Where applicable, the abstract should include the following:

(1) if a machine or apparatus, its organization and operation;

(2) if an article, its method of making;

(3) if a chemical compound, its identity and use;

(4) if a mixture, its ingredients;

(5) if a process, the steps.

Extensive mechanical and design details of apparatus should not be given.

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

**Art Unit: 3728** 

#### Arrangement of the Specification

3. As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a).

"Microfiche Appendices" were accepted by the Office until March 1, 2001.)

- (f) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.

**Art Unit: 3728** 

(h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).

- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (I) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

#### **Content of Specification**

- a. <u>Title of the Invention</u>: See 37 CFR 1.72(a) and MPEP § 606. The title of the invention should be placed at the top of the first page of the specification unless the title is provided in an application data sheet. The title of the invention should be brief but technically accurate and descriptive, preferably from two to seven words may not contain more than 500 characters.
- (b) <u>Cross-References to Related Applications</u>: See 37 CFR 1.78 and MPEP § 201.11.
- (c) <u>Statement Regarding Federally Sponsored Research and Development:</u>
  See MPEP § 310.
- (d) The Names Of The Parties To A Joint Research Agreement: See 37 CFR1.71(g).

Page 6

Application/Control Number: 10/710,546

**Art Unit: 3728** 

- (e) Incorporation-By-Reference Of Material Submitted On a Compact Disc:

  The specification is required to include an incorporation-by-reference of electronic documents that are to become part of the permanent United States Patent and Trademark Office records in the file of a patent application. See 37 CFR 1.52(e) and MPEP § 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text were permitted as electronic documents on compact discs beginning on September 8, 2000.

  Or alternatively, Reference to a "Microfiche Appendix": See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.
- (f) <u>Background of the Invention</u>: See MPEP § 608.01(c). The specification should set forth the Background of the Invention in two parts:
  - (1) Field of the Invention: A statement of the field of art to which the invention pertains. This statement may include a paraphrasing of the applicable U.S. patent classification definitions of the subject matter of the claimed invention. This item may also be titled "Technical Field."
  - (2) Description of the Related Art including information disclosed under

    37 CFR 1.97 and 37 CFR 1.98: A description of the related art

    known to the applicant and including, if applicable, references to

    specific related art and problems involved in the prior art which are

Art Unit: 3728

Page 7

solved by the applicant's invention. This item may also be titled "Background Art."

- or general statement of the invention: See MPEP § 608.01(d). A brief summary or general statement of the invention as set forth in 37 CFR 1.73. The summary is separate and distinct from the abstract and is directed toward the invention rather than the disclosure as a whole. The summary may point out the advantages of the invention or how it solves problems previously existent in the prior art (and preferably indicated in the Background of the Invention). In chemical cases it should point out in general terms the utility of the invention. If possible, the nature and gist of the invention or the inventive concept should be set forth. Objects of the invention should be treated briefly and only to the extent that they contribute to an understanding of the invention.
- (h) <u>Brief Description of the Several Views of the Drawing(s)</u>: See MPEP § 608.01(f). A reference to and brief description of the drawing(s) as set forth in 37 CFR 1.74.
- (i) Detailed Description of the Invention: See MPEP § 608.01(g). A description of the preferred embodiment(s) of the invention as required in 37 CFR 1.71. The description should be as short and specific as is necessary to describe the invention adequately and accurately. Where elements or groups of elements, compounds, and processes, which are conventional and generally widely known in the field of the invention

**Art Unit: 3728** 

described and their exact nature or type is not necessary for an

Page 8

should not be described in detail. However, where particularly

complicated subject matter is involved or where the elements,

compounds, or processes may not be commonly or widely known in the

understanding and use of the invention by a person skilled in the art, they

field, the specification should refer to another patent or readily available

publication which adequately describes the subject matter.

(j) Claim or Claims: See 37 CFR 1.75 and MPEP § 608.01(m). The claim or

claims must commence on separate sheet or electronic page (37 CFR

1.52(b)(3)). Where a claim sets forth a plurality of elements or steps, each

element or step of the claim should be separated by a line indentation.

There may be plural indentations to further segregate subcombinations or

related steps. See 37 CFR 1.75 and MPEP § 608.01(i)-(p).

(k) Abstract of the Disclosure: See MPEP § 608.01(f). A brief narrative of the

disclosure as a whole in a single paragraph of 150 words or less

commencing on a separate sheet following the claims. In an international

application which has entered the national stage (37 CFR 1.491(b)), the

applicant need not submit an abstract commencing on a separate sheet if

an abstract was published with the international application under PCT

Article 21. The abstract that appears on the cover page of the pamphlet

published by the International Bureau (IB) of the World Intellectual

**Art Unit: 3728** 

Property Organization (WIPO) is the abstract that will be used by the USPTO. See MPEP § 1893.03(e).

- (I) Sequence Listing, See 37 CFR 1.821-1.825 and MPEP §§ 2421-2431.

  The requirement for a sequence listing applies to all sequences disclosed in a given application, whether the sequences are claimed or not. See MPEP § 2421.02.
- 4. An examination of this application reveals that applicant is unfamiliar with patent prosecution procedure. While an inventor may prosecute the application, lack of skill in this field usually acts as a liability in affording the maximum protection for the invention disclosed. Applicant is advised to secure the services of a registered patent attorney or agent to prosecute the application, since the value of a patent is largely dependent upon skilled preparation and prosecution. The Office cannot aid in selecting an attorney or agent.

A listing of registered patent attorneys and agents is available on the USPTO Internet web site http://www.uspto.gov in the Site Index under "Attorney and Agent Roster." Applicants may also obtain a list of registered patent attorneys and agents located in their area by writing to the Mail Stop OED, Director of the U. S. Patent and Trademark Office, PO Box 1450, Alexandria, VA 22313-1450

#### Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

**Art Unit: 3728** 

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim is narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

Claim 1 also recites the limitations "the right inside wall" in line 4; "the right and left side corners" in line7; "the top back wall" in lines 7-8; "the front" in line 9; "the back wall" in line 13. There is insufficient antecedent basis for these limitations in the claim.

All limitations of a claim must be properly introduced for clarity between different limitations. See MPEP 2173.05(e).

#### Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.

**Art Unit: 3728** 

2. Ascertaining the differences between the prior art and the claims at issue.

Page 11

3. Resolving the level of ordinary skill in the pertinent art.

4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kliot (US Pat No 5,509,589) in view of Stobbs, II et al., (US Pat No 6,561,329) and Speck (US Pat No 5,588,529).

With respect to claim 1, Kliot discloses a fabric pouch (Kliot Fig 1 reference number 10; see also column 4, lines 15-17) that allows for storage and safe keeping of a helmet (column 1, lines 66-67 and continued on column 2, line 1), and capable of storing a baseball/softball mitt and can be closed by a drawstring (Fig 6, reference number 58). Kliot also discloses a right inside wall (Fig 3 reference number 16 on the right side of reference number 26) with a second smaller pouch (Fig 3 reference number 12 on the right side), a back wall with left and right top corners (Fig 2 reference number 24 and Fig 4 generally) and a flap (Fig 6 reference number 38) folding forward over the front and is attached from the top back wall to provide privacy of contents and a method to keep the contents of the pouch clean. Kliot does not disclose two clasps attached by straps located on the right and left side corners of the top back wall, that the flap displays names or logos, a pouch located on the back wall or a carrying strap to connect both clasps making it convenient to carry. However, Stobbs discloses an athletic equipment bag with two clasps (Fig 3 reference number 70) attached by straps (column 3, lines 63-67 and column 4, lines 1-2) located on the right and left side corners of the top back wall, a pouch (Fig 6 reference number 28) located on the back wall and a carrying strap with clips (Fig 2 reference number 36) capable of connecting both

**Art Unit: 3728** 

clasps making the bag convenient to carry. Speck discloses a baseball equipment bag showing that names or logos can be displayed anywhere on the bag/pouch (Speck Fig 7). Therefore, it would have been obvious to one of ordinary skill in the art at the time of invention to modify the Kliot backpack to include two clasps attached by straps located on the right and left side corners of the top back wall to allow the bag to hang on a fence (Stobbs column 4, lines 1-2), a pouch located on the back wall for additional storage of equipment or gear (Stobbs column 3, lines 52-55), a carrying strap to connect both clasps making it convenient to carry and a name or logo on the flap for identification of the owner of the bag.

With respect to Applicant's reference to dimensions and size of the pouch and it's associated component parts, it would have been an obvious matter of design choice to one of ordinary skill in the art at the time the invention was made to specify dimensions for the size of the pouch and its various parts for a particular use, since such a modification would have involved a mere change in the size of a component. A change in size is generally recognized as being within the level of ordinary skill in the art. *In re Rose*, 105 USPQ 237 (CCPA 1955).

#### Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Comeau (US Pat No 4,693,402) discloses a sports pack with a drawstring closure. Fowler (US Pat No 5,975,293) discloses a sports bag for storing a baseball helmet and other baseball equipment.

### **Privacy Act Statement**

The **Privacy Act of 1974 (P.L. 93-579)** requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

- The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
- 2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
- A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
- 4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
- A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
- 6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
- 7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
- 8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
- A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.
